

GASTRONOMICS AND PATHOLOGY

Pages with reference to book, From 232 To 232

Azhar Mubarik (Armed Forces Institute of Pathology, Rawalpindi.)

In olden days, pathologists and clinicians were fond of correlating various pathological conditions with edibles, which! could be due to their good eating habits or vivid gourmet imagination. Following few culinary descriptions are selected, but please do not read this article before taking your lunch or supper, for obvious reasons.
